English | Hindi

### SKILLS AND FRAMEWORK

JAVA | MySQL | HYBERNATE | SPRING BOOT | JAVASCRIPT  
HTML | CSS | GITHUB | DATA STRUCTURES AND ALGORITHMS

### SOFT SKILLS

PROBLEM SOLVING | ADAPTABILITY | LEADERSHIP  
REMOTE WORK AND ONLINE COLLABORATION

### PROJECTS

#### Online Trip Management System

##### Demonstration Video:

- An development of RESTful API for an application. This API performs all the fundamental CRUD operations of any Trip Management Application platform with user validation at every step

##### Admin Features:

- Administrator Role of the entire application
- Only registered admins with valid session token can add/update/delete Package, Hotel, Route, Bus or customer from main database
- Admin can access the details of different Routes, Bus, Packages, TicketDetails, Feedback, Customer, Reports, etc.

##### User Features:

- A user can register himself or herself on the platform
- He/She can check the Packages and Hotels availability
- If Trip Package is available, can book the trip package by providing payment details
- After booking, he will get booking details for the whole Package inside this there will be all details regarding the ticket details ,total cost, etc.
- If the customer want can cancel the booking

##### Area of Responsibility:

- Created the customer module flow
- Integrated validation throught the app
- Create Travel and Bus module flow

##### Tech Stack:

- SpringBoot | JAVA | Hibernate | MySQL | Swagger
- An Collaborative Project Consisting Of the 5 Developer Depicting the implementation of the Trip Managment Platform like MakeMyTrip or Yatra and it was completed in 5 days.

#### INDIA MART CLONE

##### Github Link:

- A well known e-commerce web app clone. It manufactures and markets a range of cosmetic products under the brand Blue Heaven

##### Feature:

- Proper backend integration with login & signup for user authentication
- Implementing media query for every screen size
- For best user experience we put navigation bar and search functionality

##### Area of Responsibility:

- My responsibility was to create - cart section and payment section, for best user experience I used pop-up and window method

##### Tech Stack:

- HTML, CSS, JAVASCRIPT
- This was a collaborative project and was completed in 5 days with four more team members.

#### KIMAYA CLONE

##### Github Link:

- Kimaya is a online website thats offers to purchase fresh Indian & exotic fruits. It is a hassle free online fruit ordering platform in Mumbai and Delhi, Kimaye promises consistently delivering the safest and superior quality fruits

##### Feature:

- Proper backend integration with login & signup for user authentication
- Implementing media query for every screen size
- For best user experience , used sorting and searching functionality

##### Area of Responsibility:

- My responsibility was to create Product page and Cart page

##### Tech Stack:

- HTML | CSS | JAVASCRIPT
- A Collaborative project led by me and developed in 5 days with 4 more team members.
